

I have been hearing a lot in the past few days about Sinclair Broadcasting's plan to force their stations to air an anti-Kerry "documentary" just prior to the election.

This partison use of our public airwaves is against the law. It's a frightening example of how consolidated news media want to control what citizens hear and think, distorting the news for private gain.

If Sinclair goes through with this plan, they should lose their license.

Thank you for listening.
